

This binder contains all the reference material gather and organized for the perioperative clinical student (Policy & procedures, Drug/info, Pictures for prepping & positioning, etc.. The binder is divided into sections (Preop, OR, Postop).

### Perioperative Student Learning Objectives & Outcomes

Student will:

| <b>Preoperative unit</b>   | Teaching Method & Evaluation Method |
|--|-------------------------------------|
| 1. Utilize 2 Patient Identifies                                  | Reading/Observation                 |
| 2. Identify & Demonstrate IV assessment/supplies/equipment usage | Simulation/Observation              |
| 3. Discuss Policy & Procedures related to Preop                  | Reading/Case study                  |
| 4. Discuss Surgical & Anesthesia Consents                        | Reading/Case study                  |
| 5. Demonstrate Perioperative Documentation                       | Hands-on/Observation                |
| 6. Discuss Medication Administration & Common Preop Drugs        | Reading/Case study/Observation      |
| 7. Identifies need for site marking                              | Reading/Case study                  |
|  |                                     |
| <b>Operating Room</b>  |                                     |
| 1. Discuss Common OR Drugs                                       | Reading/Verblization                |
| 2. Demonstrate Safe Patient Positioning                          | Video/Simulation/Observation        |
| 3. Demonstrate Patient Skin Prepping                             | Video/Simulation/Observation        |
| 4. Performs Surgical Time Out                                    | Video/Simulation/Observation        |
|  |                                     |
| <b>Post Operative Unit</b>                                       |                                     |
| 1. Monitor Oxygen Saturation (Airway Management)                 | Simulation/Observation              |
| 2. Discuss Pain Management                                       | Reading/Verbilization               |
| 3. Demonstrate Nausea & Vomiting Protocol                        | Reading/Verbilization               |
| 4. Demonstrate Surgical Wound Assessment                         | Simulation/Observation              |
| 5. Demonstrate Postoperative Documentation                       | Hands-on/Observation                |
